

HOW TO GET STARTED WITH MESOTHERAPY IN YOUR PRACTICE

To help maximize the skills you have learned and to assist you in implementing Mesotherapy into your practice immediately, we have gone through and chosen 3 effective formulas that you can begin to work with immediately.

Below are the protocols for Lipolysis, Cellulite and Skin Rejuvenation to get you started!

LOCALIZED FAT:

Indications: Suitable for localized fat on the body.

Injection Depth: 6mm - 12mm

Injection Spacing: 4cm apart

Injection Amount: 0.4cc

Total Injected Volume: 5 - 20cc

Injection Method: Point by Point

Equipment:

18G 1 ½ inch drawing up needle

Disinfectant

Manual Application: 5ml syringe with 6mm 30G Mesotherapy needle or multi injector

Mesotherapy Gun Application: 5cc - 20cc syringe with ½ inch 30G Mesotherapy needle

Procedure:

1. Disinfect the area to be treated with appropriate solution.
2. Map the area to be treated in each session.
3. Perform the procedure with the patient lying down.
4. Draw up the required quantity of ingredients
5. Start the injection of ingredients in the area to be treated. Introduce the drugs smoothly with a regular interval between each dose.
6. Take care to respect the locations of the vascular and nervous systems, in order to diminish the possibility of hematoma.

Treatment Schedule: Every 2-3 weeks

PROTOCOL

5cc syringe x (2-8 syringes)

5cc syringe volume

2cc Phosphatidycholine 100mg/ml

1cc Aminophylline 25mg/ml

1cc L-Carnitine 500mg/ml
